Product Requirements Document

Prepared for

Two Rivers International Finance & Innovation Center

Prepared by

Tendersure Africa SEZ Limited

1st September 2025

1. Introduction

The **Trific platform** is a curated marketplace connecting clients with pre-qualified service providers. Built on a **vettred-provider model** (aligned with TenderSure's approach), which ensures efficiency, trust, and reduced risk. Unlike bidding marketplaces, Trific enables clients to directly engage vetted service providers without posting jobs.

2. Objectives

- Create a digital marketplace where Kenyan service providers can find a market for their services globally
- Enable clients to quickly discover and engage vetted providers.
- Eliminate bidding; providers are pre-vetted and listed in a trusted directory.
- Ensure transparency through structured vetting and quarterly re-evaluations.
- Provide secure messaging, contract facilitation, and payments within the platform.

3. Personas & User Journeys

3.1 Persona 1: Corporate Client (e.g., Pepsi Procurement Manager)

- **Goal:** Quickly find and engage vetted legal or financial service providers in Kenya.
- **Pain Points:** Limited time to evaluate suppliers, risk of hiring unqualified providers.
- **Journey:**
 - Logs into platform.
 - Searches directory (e.g., Legal → Litigation Lawyers).
 - Filters by rating and static pricing.
 - Shortlists vetted providers.
 - Initiates secure communication for clarifications.
 - Engages provider and uploads finalized contract.

3.2 Persona 2: Local Service Provider (e.g., Kenyan Law Firm)

- **Goal:** Join Trific platform to gain international clients.
- **Pain Points:** Need visibility and credibility to attract global brands.
- **Journey:**
 - Sign up and complete questionnaire.
 - Uploads KYV/KYB documents.
 - Undergoes TenderSure vetting and scoring.
 - Upon approval, creates portfolio and uploads static rate card.
 - Appears in client directory and receives direct client engagements.

3.3 Persona 3: Platform Administrator (TenderSure Vetting Officer)

- **Goal:** Ensure only high-quality, vetted providers are visible.
- **Pain Points:** Need to prevent reputational risks for clients.
- **Journey:**
 - Reviews provider submissions.

- Applies evaluation scoring.
- Approves/rejects providers.
- Monitors quarterly re-evaluation deadlines.
- Blacklists underperforming providers.

3.4 Persona 4: Management (Platform Oversight & Operations)

- **Goal:** Oversee platform operations, ensure compliance, manage financial flows, and resolve disputes.
- **Pain Points:** Balancing trust for international clients with efficiency, ensuring escrow security, and handling escalations quickly.
- **Journey:**
 - Reviews and approves escrow release requests.
 - Intervenes in disputes using secure messaging logs.
 - Ensures compliance with legal and financial regulations.
 - Provides final approval for project handovers and operational reporting.

4. Functional Requirements

4.1 Home Pages

Features

- Service Providers: Service provider listing, filter by category and sub-category.
- Guides: Have a list of FAQs for clients and service providers.
- Company information (Trific): Have links to important information e.g. contact details, privacy policy, social media pages.

Acceptance Criteria

- Users can visit the landing page, filter service providers by category and sub-category, view their rating and rate cards.

Workflow – Client Journey

[Visit System Domain] → [Filter Service Provider] → [View Service Provider Details]

4.2 Client Portal

Features

- Dashboard: Show a summary of monthly spend, completed projects, ongoing projects, cancelled projects.
- Provider Discovery: Browse/search vetted providers by category, subcategory, rating, and price.
- Provider Profiles: View portfolios, references, static rate cards, and ratings.
- Job management: Clients will create, update and publish jobs for service providers to view and action on.
- Direct Selection: Engage providers directly without posting jobs.

- Contract Facilitation: Upload and view contracts and milestones securely with chosen providers.

Acceptance Criteria

- Clients can filter providers by category, subcategory, rating, and price.
- Provider profile updates are visible in client search instantly.
- Selecting a provider enables contract upload/management within the system.

Workflow – Client Journey

[Login] → [Search Directory] → [Filter Providers] → [View Profile]
 → [Select Provider] → [Secure Messaging] → [Upload/Exchange Contract]
 → [Engagement Begins]

4.3 Service Provider Portal

Features

- Dashboard: Show a summary of earnings per month, completed contracts, ongoing contracts, cancelled contracts.
- Onboarding: Providers sign up, complete questionnaire which will include details on: work done, references and rate card, submit KYV/KYB documents, vetting with scoring, vetting will require a fee.
- Available Jobs: Providers will view available jobs, receive email alerts and contact the client.
- Visibility: Appear in client directory only after passing vetting.
- Job Invitations: Receive direct selections from clients.

Acceptance Criteria

- Providers must submit KYV/KYB documents before approval.
- Approved providers appear in client directory only after scoring.
- Providers' portfolio updates appear immediately on client-facing profiles.

Workflow – Provider Journey

[Sign Up] → [Questionnaire + Document Upload] → [TenderSure Vetting]
 → [Pass? YES → Approved → Create Portfolio & Rate Card]
 NO → [Rejected – Not Visible]

4.4 Admin Portal (TenderSure)

Features

- Dashboard: Show a summary of verified service providers, pending verifications, payment settlements, completed contracts, pending contracts, ongoing contracts.
- Vetting Workflow: Manage provider questionnaires, documents, and evaluations.
- Scoring: Criteria setup, apply TenderSure evaluation with pass/fail thresholds.
- Directory Management: Approve/reject providers and manage categories.

- **Audit & Compliance:** Enforce quarterly re-evaluations and blacklist underperforming providers.

Acceptance Criteria

- Admin can approve/reject providers with scoring rationale.
- Providers due for quarterly re-evaluation are flagged automatically.
- Anomalies or performance issues trigger automatic suspension.

Workflow – Vetting Process

```

    A["[Provider Applies]"] --> B["[Questionnaire Completed]"]
    B --> C["[Documents Submitted]"]
    C --> D["[Evaluation Engine]"]
    D --> E["[Score ≥ Threshold? YES]"]
    E --> F["Approved"]
    F --> G["Directory"]
    D --> H["NO"]
    H --> I["Rejected (Hidden)"]

```

4.5 Management Portal (Trific)

Features

- **Dashboard:** Show a summary of verified service providers, pending verifications, payment settlements, completed contracts, pending contracts, ongoing contracts.
- **Financial Operations:** Manage escrow, payouts, and refunds.
- **Dispute Resolution:** Access messaging logs for escalated cases.

Acceptance Criteria

- Escrow release requests require management approval.
- Messaging logs are accessible only for disputes.

5. Messaging

- In-app messaging between clients and providers.
- Used for clarifications and secure contract discussions.
- Negotiation tools are explicitly excluded.

Acceptance Criteria

- Clients can initiate clarifications via messaging.
- Contracts and documents shared via messaging are encrypted and secure.

Workflow

```

    A[Client Selects Provider] --> B[Secure Chat Opens]
    B --> C[Clarifications/Docs Shared]
    C --> D[Contract Upload/Review]
    D --> E[Engagement Finalized]
```

6. Payments

- Gateways: PayPal, DPO, Mpesa.
- Trade Finance: Sidian Bank integration for supplier financing.
- Currency: USD default; conversions handled by gateways for client to service provider payments and KES for service provider verification payments.
- Escrow: All payments flow through escrow until milestones are approved.

Acceptance Criteria

- Deposited funds are held in escrow.
- Approved milestones trigger automatic release to providers.
- Provider withdrawals are handled via payout methods.

Workflow – Payments

7. Tech Stack

Component	Technology
Backend	Django, Django REST Framework
Frontend	Vue.js, TypeScript, SCSS, storyblok (CMS)
Database	PostgreSQL
Messaging	Stream / TalkJS / Custom Solution
Payments	PayPal SDK, Stripe API, Sidian Bank API
Notifications	Web Sockets (Django Channels), Push API
Hosting/Infra	AWS (EC2, RDS, S3)
Monitoring	Sentry, Celery for async tasks

8. Release Criteria (4-Week Development Window)

- **Core System Scope:**
 - Client portal with provider directory, profiles, filtering, and messaging.
 - Provider portal with onboarding, vetting approval, and portfolio setup.
 - Admin portal with vetting workflow and scoring system.
 - Payments with escrow integration (deposit → milestone approval → release).
- **Stability & Testing:**
 - Critical workflows are covered with automated testing.
- **Compliance:**
 - KYV/KYB data handling aligned with GDPR & Kenyan data privacy rules.
 - Blacklisting and quarterly re-evaluation checks implemented.

9. Release Timeline (4 Weeks)

- **Week 1:** Finalize requirements, design workflows, and build core data models.
- **Week 2:** Develop Client and Provider portals (directory, onboarding, portfolios).
- **Week 3:** Implement Management portal, Admin portal (vetting, scoring, approvals) + payments integration.
- **Week 4:** Add messaging, run QA/UAT with pilot users, fix bugs, and prepare release.
